ECON 3248 Key topics..

1) Immigration in the United States: Is California our future?

2) Refugees/human rights driven migration in the U.S. and Europe: immigration..

3) Migration, gender and poverty in South Asia... in Asia: has China reached a “Lewis turning point..”?
Part 1: Books History of U.S. immigration, compare to France, UK and Germany... Marilyn Hoskins CUNY

WHY JFK’S BOOK? $3.99 FROM PICKLE PRESS (KINDLE VERSION...
Part 2: Humanitarian Refugee integration.. Central America was/is a model of how its done?
Betts and Collier, some good ideas & pictures but not worth buying.. Six “new ideas”

1. All refugees have right of “rescue” a moral obligation for us. To help, as when we see a child drowning in a pond...

2. It is better to help refugees stay in neighboring nations, Jordan, Kenyan, Pakistan, Mexico, etc.

3. They need work and education not just tents and food... major point...

4. Globalization can provide jobs and prepare for post-conflict recovery, e.g. in Syria..
Betts and Collier, issue fair warning early, manage to insult everyone, especially “eurocentrics…”

1. Angela Merkel is “headless heart” saying “we can do this to millions of refugees from Syria/Eritrea

2. UNCHR is leftover humanitarian “silo” not realizing why everyone hates their camps...

3. Refugees are not migrants and should not be allowed to migrate to rich nations: bad for everyone

4. Mainly good reasons, but Collier has some Atticus Finch moments... his family is from Germany...
Collier has similar problems in Exodus..

1. Watch Al Jazeera Head to Head with
2. Robert Putnam calls this book “magisterial” but then
   retracts his own argument...
3. Collier was right about limits, and Shengen shock
   caused by immigrants, contributed to Trump and Brexit.
   Mainly good reasons, but Collier has some Atticus Finch
   moments... his family is from Germany...
Part 2: Humanitarian Refugee integration. Readings?
Betts and Collier are against longer term integration: return refugees once conflict ends: to Syria under Assad?
Are refugees a burden on the taxpayer? New NBER paper presents evidence suggests that, with a long enough perspective, the answer is no. William N. Evans and Daniel Fitzgerald, in The Economic and Social Outcomes of Refugees in the United States: Evidence from the ACS (NBER Working Paper No. 23498), find that over their first 20 years in the United States, refugees who arrived as adults aged 18-45 contributed more in taxes than they received in relocation benefits and other public assistance. They also find that the younger the refugees were when they resettled in America, the more likely they were to catch up with their native-born peers educationally and economically.
Somalia: Remittances as Famine Relief (Oxfam video) and Refugees return: Mohamed A. Mohamed SUNY Buffalo graduate elected President of Somalia...
China’s reaches its Lewis Turning Point (43% urbanized)
FT Magazine on China  Great Migration Ends?
FT Magazine on China  Great Migration Ends?
Part 3: migration changes gender roles, always... reduces severe poverty here and in Asia.
Replication by Abascal & Baldassarri, 2015* using his original data and Putnam (2012) revises much of Putnam's (2007) E Pluribus Unum (out of many, one) article cited by Collier to argue immigration reduces social capital by increasing diversity and reducing trust (for which he cites Robert Putnam as in Bowling Alone). This article says they used the same data Putnam's dataset putnam did to show that the causal link is not from diversity to lack of trust, but from cultural and SES factors to a lack of trust... the Putnam, 2012 says diversity has ST costs but is "inevitable and beneficial" long run benefits... though he also said this in 2007, less forcefully... Read about their replication here,

quotes from Putnam's Amicus brief "The evidence that Dr. Putnam reviewed in his essay demonstrated that increased diversity in the United States and other advanced nations is inevitable and that, while this fact may present challenges in the short to medium term, increased diversity can benefit society in the medium to long term by including a broader range of groups within what it means to be, for example, an American. Page Brief Of Dr. Robert D. Putnam As Amicus Curiae In Support Of Respondents (see link in NY Times or url below) First, “[i]ncreased immigration and diversity are not only inevitable, but over the long run they are also desirable. Ethnic diversity is, on balance, an important social asset, as the history of [the United States] demonstrates.” Id. at 138. Second, “[i]n the short to medium run, however, immigration and ethnic diversity challenge social solidarity and inhibit social capital.” Id. Third, “[i]n the medium to long run, on the other hand, successful immigrant societies create new forms of social solidarity and dampen the negative effects of diversity by constructing new, more encompassing identities.” Id. at 138-39. Accordingly, “the central challenge for modern, diversifying societies is to create a new, broader sense of ‘we.’” page 5 Putnam cites also (have not read) Scott E. Page, The Difference: How the Power of Diversity Creates Better Groups, Firms, Schools and Societies (2007). [http://nyti.ms/1XFQdh3](http://nyti.ms/1XFQdh3)

A Nation of Immigrants (1959) Kennedy’s and Johnson set out to end race based quota system relaxed in 1965 U.S. immigration shifted quietly but decisively

1924 Immigration restricted: a series of “Asian exclusion acts”

1965 Immigration and Nationality Act, aka. the Hart-Cellar Act (signed by with little fanfare by President Johnson initiated by President & Attorney General Kennedy and Rep. Emmanuel Cellar of Brooklyn)

1986 Immigration Reform and Control Act of 1986, (IRCA or Simpson-Mazzoli Act) - requires employers to verify employees' immigration status. - made it illegal to knowingly hire unauthorized immigrants. - granted amnesty to about 3 million immigrants who entered the US before January 1, 1982 and resided here continuously.

TPS & H-2 visas “costless” aid to Haitians?

1) Michael Clemens et al at CGDEV proposed 2000 H-2 visas for Haiti (got them on list)

2) Haitians Temporary Protected Status (work permits as with DACA or DAPA)

3) 8 of 10 Haitians who have escaped poverty did so via immigration or remittances

4) Other Haiti Aid program ($6B) problematic
BOX 3.4 USE AND EFFECTS OF REMITTANCES: SOME EMPIRICAL EVIDENCE

Several studies on the use and effects of remittances have been undertaken. Adams used a household data set from Guatemala to analyse how remittances affect the spending behaviour of households. His results show that recipients of remittances spent marginally more on education, health and housing than on items such as food. For instance,

BOX 3.6 HAWALA MONEY TRANSFERS

In the absence of formal money transfer systems provided by commercial banks or enterprises—or simply because formal systems are unwieldy or expensive—remittances are often transmitted through informal money transfer systems, including the famous hawala system in countries like Somalia. This is a trust-based money transfer system that moves as much as US$1 billion into Somalia every year. The remitter gives a hawala agent in London, for example, the sum in cash, paying a commission of perhaps five percent. The agent deposits the cash in a local bank account to be transferred to the hawala company bank account in Djibouti or Dubai. The agent then alerts the clearing house in a regional Somali capital (or, most often, Mogadishu). The clearing house, in turn, passes the details (probably by cell-phone) on to whichever agent is geographically closest to the intended recipient. Usually the recipient will already have been contacted directly by the remitter to let them know the money is coming, and will then contact the agent. The agent cannot rely on official identity papers in Somalia, so will quiz the recipient about clan lineage and other questions provided by the

Complementarity among natives & immigrants: skills/degree mismatch of foreign born vs. native workers: FB either very educated or not educated at all
Waters et al 2015 find new immigrant cohorts integrate the same as old... Borjas & Collier wrong

“outcomes of educational attainment, income, occupational distribution, living above the poverty line, residential integration, and language ability, immigrants”

... “become more similar to the native-born and improve their situation over time.” as did cohorts before them...)

see page 3 “Panel on the Integration of immigrants into American Society, National Academies Press... Mary Waters and Marisa Gerstein Pineau, eds. http://www.nap.edu/21746)
UCLA-NAID Forham CIPS migration survey shows large income gains for migrants from Mexico in New York City:

- Migration raises income from $1600 per year to about $12,000 that is from $130/month to about $1000/month for each breadwinner with less than 9 years of education from poorest Municipios in Puebla and Guererro raises...1/

- Remittances sent to Mexico raise incomes for those left behind from $130/month to $230/month in “high poverty and severe Municipios” (data from ENIGH)

- Going to college pays in New York City (compared to LA and Durham, NC) earnings for Mexican immigrants in U.S. for less than 10 years go from $26,000 to $36,000/year about 50% higher than in LA or Durham, NC.

1/ We asked everyone of the over 100 immigrants we interviewed where they were from (what Municipio in Mexico). All but two were from rural areas of Puebla and Guererro, the estimate of $130 a month is for the poorest Municipios (based on Mexico’s national household expenditure survey). The $12,000 earnings are for immigrants living in New York from Mexico for less than ten years, as computed using the combined 2005-2009 ACS for NYC, this is also roughly equal to expenditures per employed worker in the households in our survey.
Integration equality and continuity does not rule out bad outcomes....

“Still, the well-being of immigrants and their descendants is **highly dependent on immigrant starting points and on the segment of American society—the racial and ethnic groups, the legal status, the social class, and the geographic area—into which they integrate.**” Waters, et al. 2015
Immigrant surges as a research strategy: exogenous immigration shocks..

1) Cubans similar to other Hispanic & Caribbean groups arriving in U.S. (Mariel boatlift?)

2) IRCA and the 1965 Hart Cellar Act: amnesty and family reunification

3) Sanctuary cities/states “the Calif Package”: 3 dream acts, DL-ID SS#, e-verify
State of California replicates “citizenship” are working New York does not now...

- No E-Verify, driver’s licenses, medical care
- Three Dream Act tuition and scholarships
- Santa Clara University targets undocumented in HS
- Many scholarship funds and industry based groups supporting Jeff Bezos
- Pete Wilson’s warning...
Different legal Pathways used by newly admitted NYC immigrants (see Chapt 6 of *Newest New Yorkers*)

- Dominicans & Guyanese use 1990 family preferences
- Chinese, Ukrainians (& Cubans) get refugee status
- Mexicans use employment preferences
- Colombians 70% immediate relatives
- DACA/DAPA provide TPS (until 2018...)

See NYC Planning, *Newest New Yorkers*, Chapt 5 & 6
Chinese use refugee status

Haitians use refugee status
Controversies new Directions... the case for new limits on immigration

- Borjas and Collier: immigration “too costly”
- Diaporas can become “too large”
- Large diasporas undermine trust and social capital
- Example: Mexicans in California during the 1990s: their diaspora dispersed through U.S. push and pull see Tienda and Fuentes, 2014.
