Fordham University

Summer Session I

Migration, Remittances and Financial Inclusion Syllabus ECON 5808 Summer 2017: Lincoln Center Lowenstein 908 6-9pm

Course Calendar 2017

Darryl McLeod, Economics and CIPS, E527 Dealy Hall 718 817-4045 914 661-6998 mcleod@fordham.edu.

With the guest lecturers and Fordham CIPS Research Fellows: Alfredo Cuecuecha, Colegio Tlaxcala, and Norma Fuentes, CCNY Sociology and Colin Powell School. Course Calendar 2015

Course description: This inter-disciplinary course introduces students to research on remittances, international migration, microfinance, mobile banking, diaspora enterprises and other social innovations that can increase gender equity and speed poverty reduction. Our focus is immigrants in the United States as well as nations where women, immigrants and the working poor take a leading role in the migration process but also in micro-enterprising through remittances and social innovation (e.g. Mexico, India, Dominican Republic, Peru, Bangladesh, and Kenya). Does access to remittance or loans help alleviate poverty or enhance the probability of immigration and employment particularly the socio economic mobility of women and their children in both the sending and receiving, host societies? What role does the United Nations as well as the World Bank and other 'mediating' institutions (such as NGOs and MFIs) play in the globalization of migration and labor, or in the feminization of 'credit' among the poor? Are women agents of social change or unwittingly serve the needs of global capitalists in this new form of 'bottom-up' economics? How are remittances and micro financing new forms of development and what government or private interventions must take place to increase the banking or formalization of poor people's capital? Through lectures and class discussions, including presentations by invited experts, students will further explore how families in poor and developing nations can benefit from remittance and microenterprising as well as investments. Interdisciplinary case studies from Mexico, the DR, the US, India and Africa illustrate how migration financial inclusion affect employment, poverty and women's status. Guest lecturers and NY internships: To encourage relevant research projects, a number of international and local experts on migration, microfinance and development will be invited as guest lecturers. In addition, students will be introduced to ongoing research projects at the Center for International policy studies (CIPS), an interdisciplinary research center that sponsored three international conferences on comparative immigration, remittances and crisis recovery, as well as site visits by/to other local and international agencies, such as the Office of International Migration and Bethex Federal Credit Union, including possible site visits to and a number of local merchants and small entrepreneurs in the Bronx. Students are expected to participate in class discussions and prepare a final research presentation. Class project/presentation: Students will prepare a migration or financial inclusion/social innovation case study involving financial inclusion or migration or TDEs. Two presentations will be made in class, one 20 minutes presentation summarizing their case study topic and readings for feedback in the class. Students should prepare a brief outline or a presentation including references for posting or distribution to the class. Sources for the paper or power point should be clear and for all key facts, tables. and figures. The link to course readings and lectures should be clear. The last slide or page should include references in standard author (date) title, publisher format (not just urls, though these nice to have).

Course Requirements: Students should participate in class discussions, answer weekly discussion questions with answers submitted answers submitted to mcleodassign@gmail.com (be sure to put ECON 5808 in the subject). Students will also prepare the paper/presentation discussed above related to social innovation and involving immigration, remittances or financial access. Reading and discussion questions will be posted on the course calendar after each lecture.
