TPS & H-2 visas “costless” aid to Haitians?

- 1) *Michael Clemens et al at CGDEV proposed 2000 H-2 visas for Haiti (got them on list)*
- 2) Haitians Temporary Protected Status (work permits as with DACA or DAPA)
- 3) 8 of 10 Haitians who have escaped poverty did so via immigration or remittances
- 4) Other Haiti Aid program (\$6B) problematic

Remittances as post conflict relief drawing on & cultivating local ingenuity

CRISIS PREVENTION AND RECOVERY REPORT 2008

Post-Conflict Economic Recovery

Enabling Local Ingenuity

BOX 3.4 USE AND EFFECTS OF REMITTANCES: SOME EMPIRICAL EVIDENCE

Several studies on the use and effects of remittances have been undertaken. Adams used a household data set from Guatemala to analyse how remittances affect the spending behaviour of households. His results show that recipients of remittances spent marginally more on education, health and housing than on items such as food. For instance,

BOX 3.6 HAWALA MONEY TRANSFERS²⁴⁶

In the absence of formal money transfer systems provided by commercial banks or enterprises—or simply because formal systems are unwieldy or expensive—remittances are often transmitted through informal money transfer systems, including the famous hawala system in countries like Somalia. This is a trust-based money transfer system that moves as much as US\$1 billion into Somalia every year. The remitter gives a hawala agent in London, for example, the sum in cash, paying a commission of perhaps five percent. The agent deposits the cash in a local bank account to be transferred to the hawala company bank account in Djibouti or Dubai. The agent then alerts the clearing house in a regional Somali capital (or, most often, Mogadishu). The clearing house, in turn, passes the details (probably by cell-phone) on to whichever agent is geographically closest to the intended recipient. Usually the recipient will already have been contacted directly by the remitter to let them know the money is coming, and will then contact the agent. The agent cannot rely on official identity papers in Somalia, so will quiz the recipient about clan lineage and other questions provided by the

Remittances debate: tempt others to migrate

- ❑ Exchange rate appreciates, rents rise: El Salvador, Senegal yes, DR and Ghana... doing fine SSA Ok too...
- ❑ Not invested, consumed or spent on empty houses:
- ❑ Moral Hazard, people don't work (see many IMF studies on remittances)
- ❑ Considerable evidence remittance are spent on health and education (see Cuecuecha, 2016)

FIGURE 5 ■ Remittance Flows Are Larger than Official Development Assistance (ODA), and More Stable than Private Capital Flows

Remittances larger than FDI or ODA

Sending money home

Posted by Beate Stalsett Wednesday, June 15, 2016

On International Day of Family Remittances we celebrate the incredible potential that remittances – money migrant workers send home to their families – have in providing crucial financial support for millions of people in developing countries.

The Effect of Immigrants on U.S. Employment and Productivity

BY GIOVANNI PERI

IIHA LECTURE JUNE 9TH 2017

Collier uses Putnam's bowling alone argument...? That is the widely held view that immigration and diversity undermines the social contract... see Krugman and Delong on lower U.S. savings...

Replication by [Abascal & Baldassarri, 2015*](#) using Putnam's original data reinterprets Putnam's (2007) finding as inequality not Diversity...

Putnam, Robert D. (2007) "E pluribus unum: Diversity and community in the twenty-first century the 2006 Johan Skytte Prize Lecture." *Scandinavian political studies* 30, no. 2 (2007): 137-174. cited 3003 ti

Love Thy Neighbor? Ethno-racial Diversity and Trust Reexamined
Author(s): Maria Abascal and Delia Baldassarri Source: *American Journal of Sociology*, Vol. 121, No. 3 (November 2015), pp. 722-782 Published by: The University of Chicago Press Stable URL: <http://www.jstor.org/stable/10.1086/683144>.

Robert Putnam in 2015 in the fact of Texas Supreme court decision disowns his “bowling alone” as being short term thinking, in the long run diversity is an advantage

Putnam's Amicus brief

"The evidence that Dr. Putnam reviewed in his essay demonstrated that increased diversity in the United States and other advanced nations is inevitable and that, while this fact may present challenges in the short to medium term, increased diversity can benefit society in the medium to long term by including a broader range of groups within what it means to be, for example, an American. First, "[i]ncreased immigration and diversity are not only inevitable, but over the long run they are also desirable. Ethnic diversity is, on balance, an important social asset, as the history of [the United States] demonstrates." Id. at 138. Second, "[i]n the short to medium run, however, immigration and ethnic diversity challenge social solidarity and inhibit social capital." Id. Third, "[i]n the medium to long run, on the other hand, successful immigrant societies create new forms of social solidarity and dampen the negative effects of diversity by constructing new, more encompassing identities." Id. at 138-39. Accordingly, "the central challenge for modern, diversifying societies is to create a new, broader sense of 'we.' p. 5 Putnam also cites Scott E. Page, The Difference: How the Power of Diversity Creates Better Groups, Firms, Schools and Societies (2007). <http://nyti.ms/1XFQdh3>

Critical demographic bonus for Germany & Japan?

World Bank-IMF (2016) “Without migration, the working age population of the 28 EU countries is expected to decline by more than 11 million by 2020 (80 million by 2050). Under this scenario, the working-age population in Germany, Italy, and Poland will shrink by more than 1.5 million by 2020.”

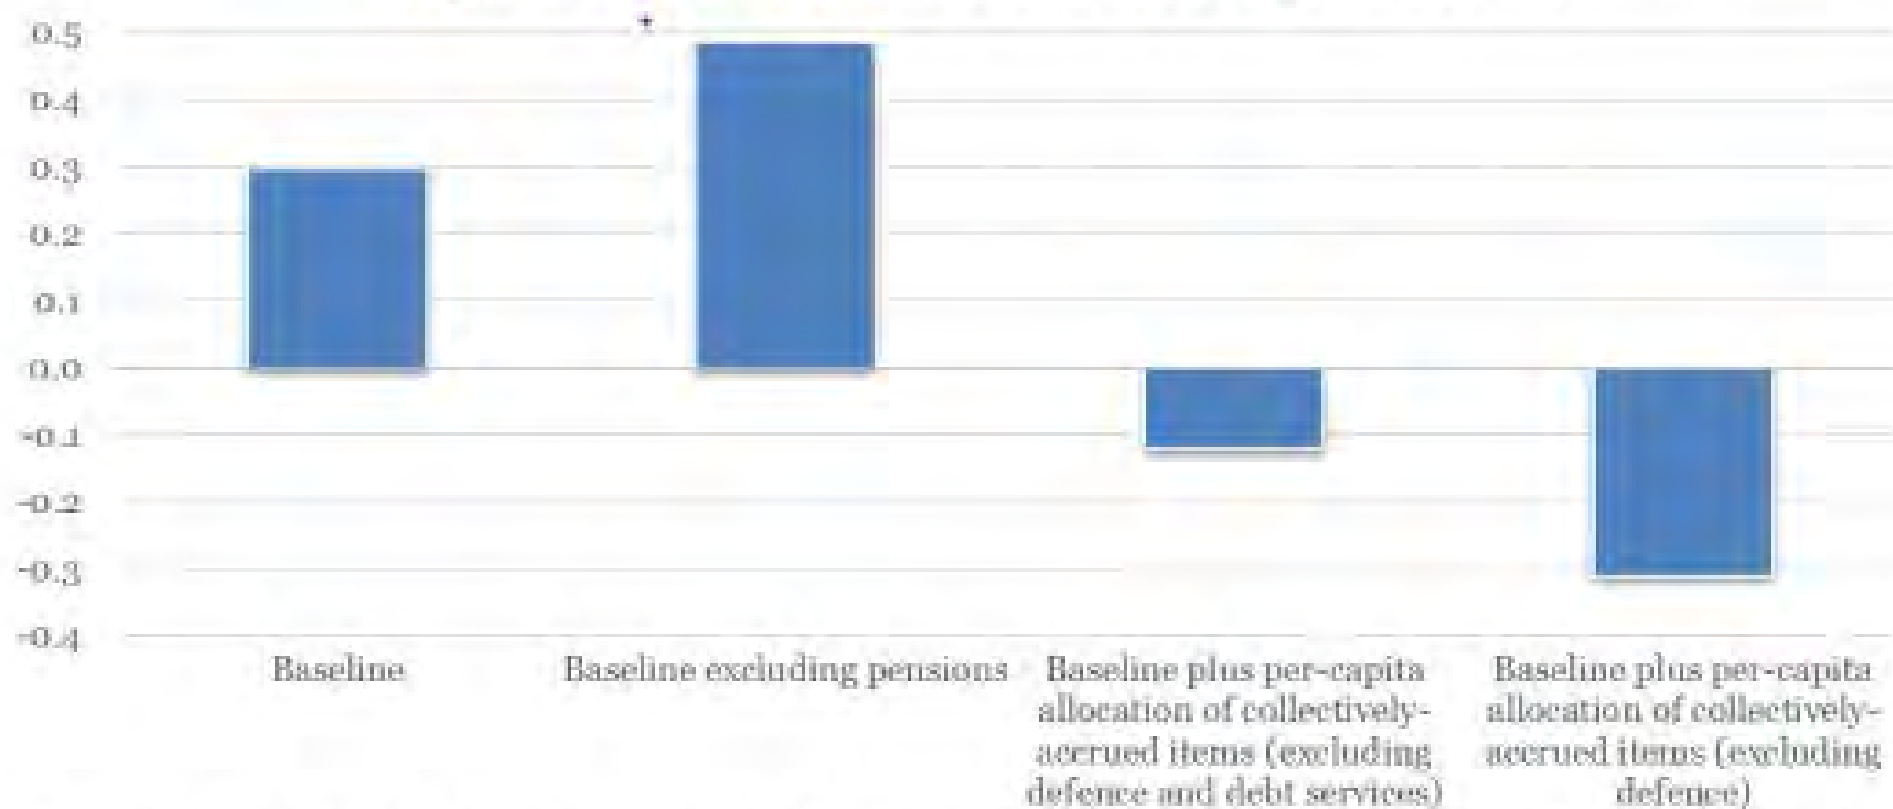

Critical demographic bonus for Germany & Japan?

B5.4.1 Public transfers to dependents are greater in Germany than in the Philippines

OECD, 2014 Fiscal impacts positive:

Estimated net fiscal impact of immigrants, with and without the pension system and per-capita allocation of collectively accrued revenue and expenditure items

Note : The "baseline" calculations include estimates for indirect taxes as well as expenditure on education, health and active labour market policy.

Source: Liebig and Mo (2013).

UCLA-NAID Forham CIPS migration survey shows large income gains for migrants from Mexico in New York City:

- ❑ **Migration raises income from \$1600 per year to about \$12,000** that is from \$130/month to about \$1000/month for each breadwinner with less than 9 years of education from poorest Municipios in Puebla and Guerrero raises...1/
- ❑ **Remittances sent to Mexico** raise incomes for those left behind from \$130/month to \$230/month in “high poverty and severe Municipios” (data from ENIGH)
- ❑ **Going to college pays in New York City** (compared to LA and Durham, NC) earnings for Mexican immigrants in U.S. for less than 10 years go from \$26,000 to \$36,000/year about 50% higher than in LA or Durham, NC.

1/ We asked everyone of the over 100 immigrants we interviewed where they were from (what Municipio in Mexico). All but two were from rural areas of Puebla and Guerrero, the estimate of \$130 a month is for the poorest Municipios (based on Mexico's national household expenditure survey). The \$12,000 earnings are for immigrants living in New York from Mexico for less than ten years, as computed using the combined 2005-2009 ACS for NYC, this is also roughly equal to expenditures per employed worker in the households in our survey.

Coming to NYC generates large gains for migrants from Puebla/Guerrero direct and via remittances

Table 2.4: Comparisons of current consumption spending by remittance and no-remittance receiving households in Guerrero, Oaxaca and Puebla Municipios classified by CONAPO Marginalization Index

Diversity as end in itself: race based quota system relaxed in 1965

U.S. immigration shifted quietly but decisively

1965 Immigration and Nationality Act, aka. **the Hart-Cellar Act** (signed by with little fanfare by President Johnson initiated by President & Attorney General Kennedy and Rep. Emmanuel Celler of Brooklyn)

1986 Immigration Reform and Control Act of 1986, (IRCA or Simpson-Mazzoli Act)

-required employers to verify employees' immigration status. -made it illegal to knowingly hire unauthorized immigrants. - granted amnesty to about 3 million immigrants who entered the US before January 1, 1982 and resided here continuously.

DACA: Deferred Action for Childhood Arrivals

set the stage for immigration reform 2013, focus on family reunification, children of immigrants

Research strategy phase III: exogenous immigration shocks..

- 1) Cubans similar to other Hispanic & Caribbean groups arriving in U.S. (Mariel boatlift?)
- 2) IRCA and the 1965 Hart Cellar Act
- 3) Sanctuary cities/states “the Calif Package”: 3 dream acts, DL-ID SS#, e-verify

State of California replicates “citizenship” are working New York does not now...

- ❑ No use of E-Verify, driver's licenses, medical care
- ❑ Three Dream Acts scholarships
- ❑ Santa Clara University targets undocumented in HS
- ❑ Many scholarship funds and industry based groups supporting
- ❑ Pete Wilson warns about Donald Trump...

New Controversies new Directions... the case for new limits on immigration

- ❑ Borjas and Collier: immigration is “too costly”
- ❑ Diaporas can become “too large”
- ❑ Large diasporas undermine trust and social capital
- ❑ Example: Mexicans in California during the 1990s: their diaspora dispersed through U.S. push and pull see Tienda and Fuentes, 2014.

Abstract

We review *Immigration Economics* (IE) by George J. Borjas, published in 2014 by Harvard

References on Putnam, 2007

Replication by [Abascal & Baldassarri, 2015*](#) using his original data and Putnam (2012) revises much of Putnam's (2007) E Pluribus Unum (out of many, one) article cited by Collier to argue immigration reduces social capital by increasing diversity and reducing trust (for which he cites Robert Putnam as in Bowling Alone). This article says they used the same data Putnam's dataset putnam did to show that the causal link is not from diversity to lack of trust, but from cultural and SES factors to a lack of trust... the Putnam, 2012 says diversity has ST costs but is "inevitable and beneficial" long run benefits... though he also said this in 2007, less forcefully... Read about their replication here,

quotes from Putnam's Amicus brief *"The evidence that Dr. Putnam reviewed in his essay demonstrated that increased diversity in the United States and other advanced nations is inevitable and that, while this fact may present challenges in the short to medium term, increased diversity can benefit society in the medium to long term by including a broader range of groups within what it means to be, for example, an American. Page* **Brief Of Dr. Robert D. Putnam As Amicus Curiae In Support Of Respondents** (see link in NY Times or url below) *First, "[i]ncreased immigration and diversity are not only inevitable, but over the long run they are also desirable. Ethnic diversity is, on balance, an important social asset, as the history of [the United States] demonstrates." Id. at 138. Second, "[i]n the short to medium run, however, immigration and ethnic diversity challenge social solidarity and inhibit social capital." Id. Third, "[i]n the medium to long run, on the other hand, successful immigrant societies create new forms of social solidarity and dampen the negative effects of diversity by constructing new, more encompassing identities." Id. at 138-39. Accordingly, "the central challenge for modern, diversifying societies is to create a new, broader sense of 'we.' page 5 Putnam cites also (have not read) Scott E. Page, The Difference: How the Power of Diversity Creates Better Groups, Firms, Schools and Societies (2007). <http://nyti.ms/1XFQdh3>*
