Sending money home

Posted by Beate Stalsett Wednesday, June 15, 2016

On International Day of Family Remittances we celebrate the incredible potential that remittances – money migrant workers send home to their families – have in providing crucial financial support for millions of people in developing countries.

Migration & mobile money speed disaster relief and boost L-term recovery...

Famine Somalia/Ethiopia

EL Salvador Post conflict

Haiti or Nepal earthquake

Lean Season BGD or PHL?

IIHA LECTURE JUNE 9TH 2017

Part I: Remittances as disaster relief...

- 1) Haiti earthquake and floods Migration TPS (not H-2 visas) as "free" disaster aid
- 2) El Salvador: Remittances & post-conflict recovery: UNDP BCPR 2008 (see Chapter 4)
- 3) Return refugees? Somalia's new President Mohamed A Mohamed: SUNY Buffalo graduate..

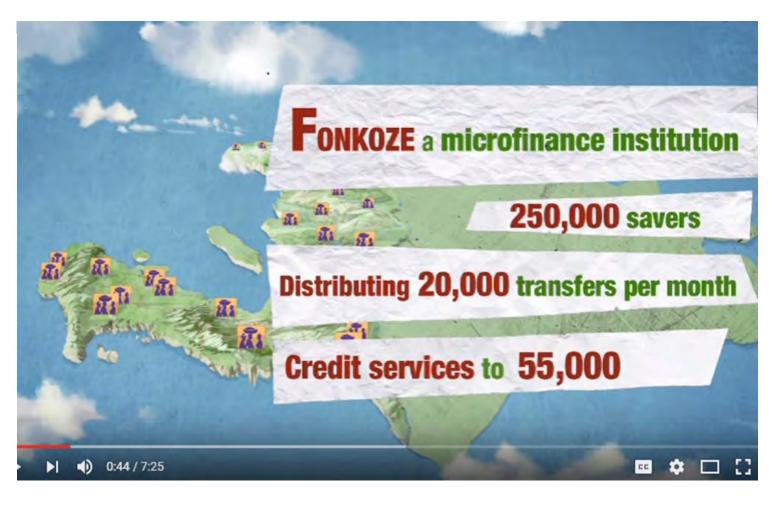

A campaign poster for Mohamed A. Mohamed in Mogadishu, Somalia, where he was born.

Somalia: Remittances as Famine Relief (Oxfam video) and Refugees return: Mohamed A. Mohamed SUNY Buffalo graduate elected President of Somalia...

Remittances as Haiti disaster relief ...

Within ten days of the 2010 earthquake, the IDB-MIF approved its Haiti Emergency **Spending Allocation Request** (HESAR) sending \$3 million to **local including MIF-Remittance Network FONKOZE & MFI** sending cash/loans almost overnight 338,000 clients and beneficiaries.

TPS as Haiti disaster relief ..

In 2010, after a 7.1-magnitude earthquake struck Haiti, killing 300,000 leaving 1.5 million homeless, Haitian community leaders, including many Miamibased advocates, appealed to the U.S. government for temporary protected status, granted nine days after the earthquake. Temporary protected status or TPS ends soon, see

<u>HARROWING TURNING POINT FOR HAITIAN IMMIGRANTS</u> By Edwidge Danticat May 12, 2017 New Yorker

Jack William and Tavneet Suri 2017 MPESA How MPESA works to reduce poverty...

The M-PESA agent who works in this shop is part of a vast network of small-time vendors. Screengrab by NPR/YouTube

Why does a mobile money app, MPESA reduce extreme poverty among women in particular, especially in rural areas? (194,000 2% of Kenyan HHs) See Science Magazine, December 2016

A new study estimates that, since 2008, access to mobile-money services — which allow users to store and exchange monetary values via mobile phone — increased daily per capita consumption levels of 194,000, or roughly 2 percent, of Kenyan households, lifting them out of extreme poverty (living on less than \$1.25 per day).

TPS & H-2 visas "costless" aid to Haitians?

- 1) Michael Clemens et al at CGDEV proposed 2000 H-2 visas for Haiti (got them on list)
- 2) Haitians Temporary Protected Status (work permits as with DACA or DAPA)
- 3) 8 of 10 Haitians who have escaped poverty did so via immigration or remittances
- 4) Other Haiti Aid program (\$6B) problematic

Hawala Money Transfers: See Chapt 3&4: UNDP BCPR, 2008

BOX 3.6 HAWALA MONEY TRANSFERS 246

In the absence of formal money transfer systems provided by commercial banks or enterprises—or simply because formal systems are unwieldy or expensive—remittances are often transmitted through informal money transfer systems, including the famous hawala system in countries like Somalia. This is a trust-based money transfer system that moves as much as US\$1 billion into Somalia every year. The remitter gives a hawala agent in London, for example, the sum in cash, paying a commission of perhaps five percent. The agent deposits the cash in a local bank account to be transferred to the hawala company bank account in Djibouti or Dubai. The agent then alerts the clearing house in a regional Somali capital (or, most often, Mogadishu). The clearing house, in turn, passes the details (probably by cellphone) on to whichever agent is geographically closest to the intended recipient. Usually the recipient will already have been contacted directly by the remitter to let them know the money is coming, and will then contact the agent. The agent cannot rely on official identity papers in Somalia, so will quiz the recipient about clan lineage and other questions provided by the

Remittances as post conflict and famine relief: money targets the poor cultivating local ingenuity

CRISIS PREVENTION AND RECOVERY REPORT 2008

Post-Conflict Economic Recovery

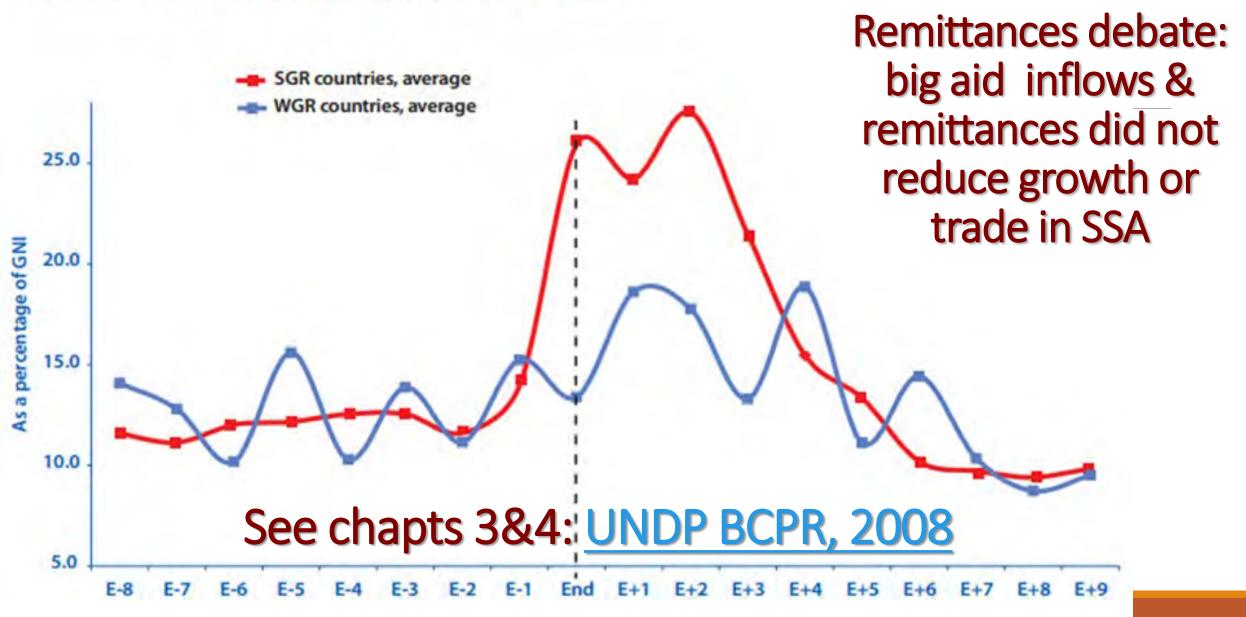

Enabling Local Ingenuity

Long term Refugee settlement..

- 1) Immigration an investment for families, aid agencies and countries (they should be able to spend the returns on that investment)
- 2) Skilled vs. unskilled immigrants...
- 3) Fiscal impacts: see California model
- 4) Right to migrate trumps economics...

Figure 4.15 ODA flows: SGR versus WGR countries

Part 2: OECD country's benefit from Refugees & long term immigration..

- 1) Impact on native wages & employment, receiving countries especially USA
- 2) Backlash in EU, Austria, USA, BREXIT?
- 3) long vs. short term costs & benefits California model: what policies
- 4) Refugee/human rights to migrate...

Borjas on immigration's cost

- 1) New immigrants not assimilating costly benefit programs (review of his book by Peri & Card)
- 2) Drive down native wages and take jobs from less and most skilled groups...
- 3) Benefit employers not native workers or students.
- 4) "We wanted workers..." (Borjas' new book quotes Max Frisch, following Krugman?)

Collier's "Exodus" critique...

- 1) New immigrants not assimilating costly benefit programs (Manchester then and now)
- 2) Migration loses economic rationale when Diasporas get large too much of a good thing...
- 3) Excess immigration undermines community, social capital, undermines welfare state, Robert Putnam's "Bowling alone"

Enter David Card and Peri UCB/UCD

- 1) California absorbed huge increase in immigrants, many highly educated, 45% if PhDs foreign born.. Many unskilled (from Mexico)
- 2) Propostion 187 denied education and medical services: Fry v. Doe 1982 struck down law
- 3) Fast growth fiscal surpluses, effective single party government (Republican Party not in running...)

David Card and Giovanni Peri UCB/UCD

- 1) Immigrants complement natives, raise wages and create employment activities
- 2) Diversity spurs innovation, raises wages & growth
- 3) Falling wages encourage investment, STEM students stimulate innovation...
- 4) Use natural experiments, Mariel boatlift, 9-11 visas; see point by point

State of <u>California replicates "citizenship"</u> are working New York does not now...

- □ No use of E-Verify, driver's licenses, medical care
- Three Dream Acts scholarships
- Santa Clara University targets undocumented in HS
- Many scholarship funds and industry based groups supporting
- Pete Wilson warns about Donald Trump...

Robert Putham in 2015 in the fact of Texas Supreme court decision disowns his "bowling alone" as being short term thinking, in the long run diversity is an advantage

Putnam's Amicus brief

"The evidence that Dr. Putnam reviewed in his essay demonstrated that increased diversity in the United States and other advanced nations is inevitable and that, while this fact may present challenges in the short to medium term, increased diversity can benefit society in the medium to long term by including a broader range of groups within what it means to be, for example, an American. First, "[i]ncreased immigration and diversity are not only inevitable, but over the long run they are also desirable. Ethnic diversity is, on balance, an important social asset, as the history of [the United States] demonstrates." Id. at 138. Second, "[i]n the short to medium run, however, immigration and ethnic diversity challenge social solidarity and inhibit social capital." Id. Third, "[i]n the medium to long run, on the other hand, successful immigrant societies create new forms of social solidarity and dampen the negative effects of diversity by constructing new, more encompassing identities." Id. at 138-39. Accordingly, "the central challenge for modern, diversifying societies is to create a new, broader sense of 'we.' p. 5 Putnam also cites Scott E. Page, The Difference: How the Power of Diversity Creates Better Groups, Firms, Schools and Societies (2007). http://nyti.ms/1XFQdh3

Collier uses Putnam's bowling alone argument...? That is the widely held view that immigration and diversity undermines the social contract... see Krugman and Delong on lower U.S. savings...

Replication by Abascal & Baldassarri, 2015* using Putnam's original date reinterprets Putnam's (2007) finding as inequality not Diversity...

Putnam, Robert D. (2007) "E pluribus unum: Diversity and community in the twenty-first century the 2006 Johan Skytte Prize Lecture." *Scandinavian political studies* 30, no. 2 (2007): 137-174. cited 3003 ti

Abascal and Baldassarri revisit Bowling Alone Putnam, 2007

Replication by Abascal & Baldassarri, 2015* using his original data and Putnam (2012) revises much of Putnam's (2007) E Pluribus Unum (out of many, one) article cited by Collier to argue immigration reduces social capital by increasing diversity and reducing trust (for which he cites Robert Putnam as in Bowling Alone). This article says they used the same data Putnam's dataset putnam did to show that the causal link is not from diversity to lack of trust, but from cultural and SES factors to a lack of trust... the Putnam, 2012 says diversity has ST costs but is "inevitable and beneficial" long run benefits... though he also said this in 2007, less forcefully... Read about their replication here,

The Effect of Immigrants on U.S. Employment and Productivity

BY GIOVANNI PERI

IIHA LECTURE JUNE 9TH 2017

(ODA), and More Stable than Private Capital Flows

Sources: World Bank Staff calculations, World Development Indicators, OECD. Private debt includes international bonds and borrowing through commercial banks.

BOX 3.4 USE AND EFFECTS OF REMITTANCES: SOME EMPIRICAL EVIDENCE

Several studies on the use and effects of remittances have been undertaken. Adams used a household data set from Guatemala to analyse how remittances affect the spending behaviour of households. His results show that recipients of remittances spent marginally more on education, health and housing than on items such as food. For instance, households receiving internal and international remittances spent 45 and 58 percent more, respectively, on education than did households with no remittances. Similarly, Kugler found that remittances were associated with an increase in human capital accumulation in recipient households in Colombia (11 percent higher spending on education). Kugler also identified potential benefits to aggregate education and employment through spillover effects. Edwards and Ureta used data from El Salvador to analyse the effect of international remittances on households' schooling and found that remittances reduced school dropouts much more than other sources of income (10 times more than other income in urban areas and 2.6 times more in rural areas). Acosta et al. analysed household surveys of 11 Latin American countries and found that "access to remittances" was positively and significantly associated with higher educational attainment in six of them. Only in two countries (Dominican Republic and Jamaica) was the effect always non-significant. They also found that the impact of remittances changed in the various countries by gender and across rural and urban areas. Yang found that the positive income shock to households in the

UCLA-NAID Forham CIPS migration survey shows large income gains for migrants from Mexico in New York City:

- Migration raises income from \$1600 per year to about \$12,000 that is from \$130/month to about \$1000/month for each breadwinner with less than 9 years of education from poorest Municipios in Puebla and Guererro raises...1/
- Remittances sent to Mexico raise incomes for those left behind from \$130/month to \$230/month in "high poverty and severe Municipios" (data from ENIGH)
- □Going to college pays in New York City (compared to LA and Durham, NC) earnings for Mexican immigrants in U.S. for less than 10 years go from \$26,000 to \$36,000/year abou 50% higher than in LA or Durham, NC.

1/ We asked everyone of the over 100 immigrants we interviewed where they were from (what Municipio in Mexico). All but two were from rural areas of Puebla and Guerrero, the estimate of \$130 a month is for the poorest Municipios (based on Mexico's national household expenditure survey). The \$12,000 earnings are for immigrants living in New York from Mexico for less than ten years, as computed using the combined 2005-2009 ACS for NYC, this is also roughly equal to expenditures per employed worker in the households in our survey.

Coming to NYC generates large gains for migrants from Puebla/Guerrero direct and via remittances

(2008 FNIGH household expenditure survey)

Citizen Cities

September

The Center Partnership the Study of "Citizenship economic, a cities.

> "Ame and s and i

Research strategy phase III: exogenous immigration shocks..

- 1) Cubans similar to other Hispanic & Caribbean groups arriving in U.S. (Mariel boatlift?)
- 2) IRCA and the 1965 Hart Cellar Act
- 3) Sanctuary cities/states "the Calif Package": 3 dream acts, DL-ID SS#, e-verify

State of <u>California replicates "citizenship"</u> are working New York does not now...

- ☐ No use of E-Verify, driver's licenses, medical care
- Three Dream Acts scholarships
- ☐ Santa Clara University targets undocumented in HS
- Many scholarship funds and industry based groups supporting
- Pete Wilson warns about Donald Trump...

New Controversies new Directions... the case for new limits on immigration

- Borjas and Collier: immigration is "too costly"
- Diaporas can become "too large"
- Large diasporas undermine trust and social capital
- Example: Mexicans in California during the 1990s: their diaspora dispersed through U.S. push and pull see Tienda and Fuentes, 2014.

Remittances tempt others to Migrate at great risk

A migrant's typical path on the more than 3,300-mile journey from West Africa

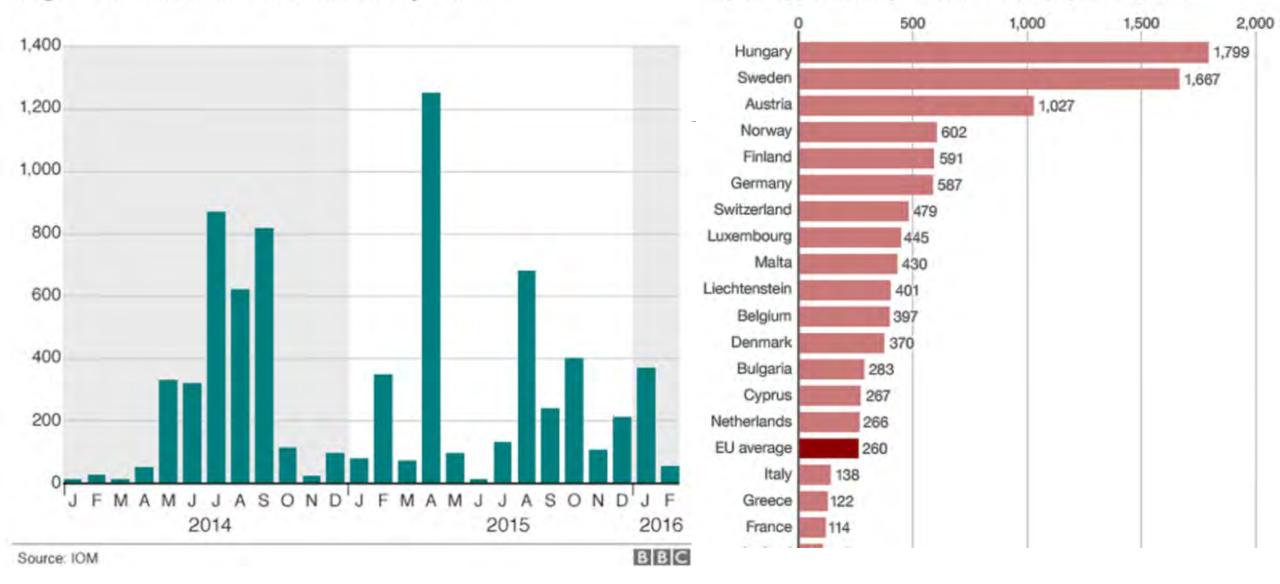

Remittances tempt others to Migrate at great risk: Ibrahima Ba is believed to have drowned April with 700 immigrants between Italy and Libya, his mother said "he wanted to have his own means" WSJ, 2015

Asylum applications per 100,000 local population, 2015

Pope Francis on Climate Refugees:

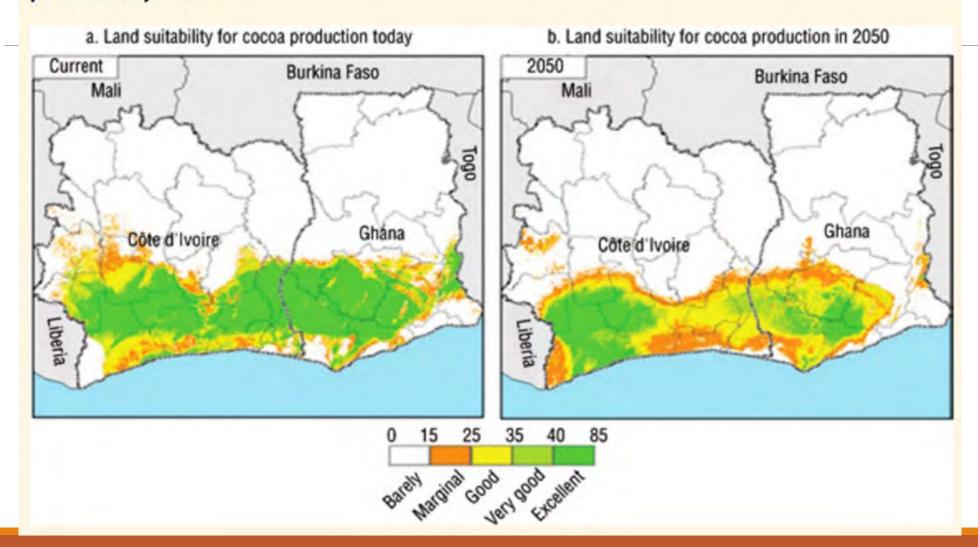

"There has been a tragic rise in the number of migrants seeking to flee from the growing poverty caused by environmental degradation. They are not recognized by international conventions as refugees; they bear the loss of the lives they have left behind, without enjoying any legal protection whatsoever"

POPE FRANCIS, 2015 ENCYCLICAL LETTER LAUDATO SI'OF THE HOLY FATHER FRANCIS—ON CARE FOR OUR COMMON FUTURE (2015).
